

SENIOR SCIENTIST

Job Advertisement

Enantis

Enantis is a biotechnology company developing, manufacturing and selling novel proteins and enzymes. By using our unique protein stabilization technology, we address the problem of poor stability of proteins. We currently focus on stabilizing proteins from the family of fibroblast growth factors (FGFs). Our first product, patented FGF2-STAB, is being manufactured at our ISO-certified production facilities and distributed globally through leading provider of life science solutions. We provide protein engineering services to external companies and continue developing a pipeline of products for the growing research, cell therapy and healthcare market.

We are now looking for a Senior scientist who will be supervising current and future research projects focused on protein engineering. Senior scientist will be also involved in laboratory operations and quality control of our production for global customers. Selected candidate will directly report to Chief Scientific Officer.

Key responsibilities

- Supervision of selected running research projects
- Regular consultations with researchers and technicians
- Data analysis, reporting and presentation of results
- Supervision of laboratory operations and immediate solving of emerging problems
- Quality control of manufacturing processes

Candidate profile

- Ph.D. in Biochemistry, Biophysics, Molecular Biology, Biotechnology or related field
- At least 3 years of work experience (exposure to company environment will be favourable)
- Experience with recombinant protein production (upstream and downstream manufacturing steps)
- Experience with protein engineering including design of mutants, construction of mutants or libraries and their screening/characterization
- Experience with difficult-to-express proteins favourable
- Experience with supervision of small team of scientists/technicians/students
- Experience with preparation of public research grant proposals and supervision of research projects
- Experience with production under ISO 9001 certification rules is favourable
- Presentation skills (for both public presentations and internal reporting)
- Diligence, reliability, flexibility, ability to work in a team, organizational and communication skills
