

Enantis

FGF2-STAB[®] Cosmetics

- New cosmetics ingredient
- Increased protein stability
- Retained skin hydration
- Reduction of wrinkles
- Skin softening
- Dermatologically and clinically tested

Enantis has developed FGF2-STAB[®] as a new ingredient for the cosmetics market. The simple formulation FGF2-STAB[®] cream prototype was successfully tested for cytotoxicity and skin irritation and shown positive results in clinical efficacy trial. Due to its increased stability, FGF2-STAB[®] is a game-changer in application of growth factors in cosmetics.

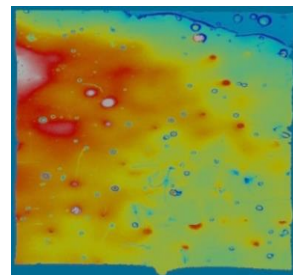

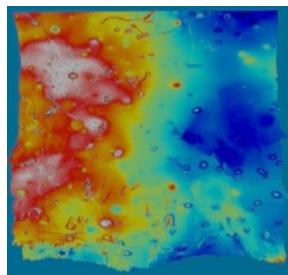

Improved skin aesthetics

Before

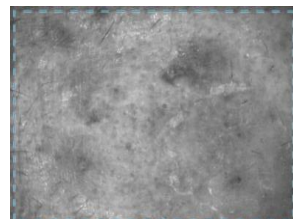

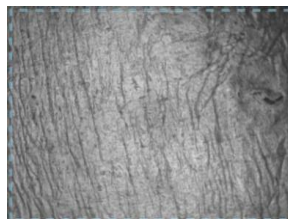

After two months

Skin surface normalization

Lower skin roughness

Project number: CZ.01.1.02/0.0/0.0/20_321/0023865
